Telehouse Environmental Policy

Telehouse Europe is committed to providing services to customers and conducting business in an ethically and socially responsible manner that respects the environment and adheres to the principles of product stewardship.

Compliance

Telehouse Europe complies with all relevant local and national laws and regulations, implements and maintains systems to assure compliance and encourages compliance from the organisations it works with.

Pollution Prevention

In its service provision, planning, purchasing, supplier selection or operating decisions, Telehouse establishes environmental objectives and targets aimed at preventing pollution and improving its overall environmental performance.

Awareness

To ensure commitment to the environment, all employees, contractors, customers and suppliers are made aware of this Environmental Policy and employees receive training on their environmental responsibilities.

Continual Improvement

Telehouse ensures that the effectiveness of the environmental management system (EMS) will be continually reviewed and improved with periodic audits, management reviews according to PDCA principles.

The environmental objectives, projects, policy and results will be reviewed annually and made available to the Company's stakeholders.

Signed

Ken Sakai
Managing Director
Telehouse Europe
