# Telehouse **TH1 Marseille**

Location: Jaguar Network Campus, 70 chemin du Passet, 13016 Marseille, France

## **TH1 Marseille**

Located within Jaguar Network Campus with a total floor area of 8000m<sup>2</sup> expandable, **TH1 Marseille** is designed to meet an often-expressed need on the part of our clients: to have access to an all-in-one package, combining the high-density connectivity of TH2 Paris Voltaire, the market-leader in France, with the outward-facing opportunities in the city of Marseille, a meeting point for the backbone networks of international carriers in Europe, Africa, Asia and the Middle East.

**TH1 Marseille** provides you with both dedicated and shared data-hosting spaces. Located away from flood zones, the campus is connected to two separate EDF sub-stations, with a total capacity of **12 MW**.

### Jaguar Network Campus technical specifications

#### **Colocation**

**TH1 Marseille** provides you with both Dedicated and Shared Facilities Management (DFM and SFM) spaces for data hosting.

The data halls have headroom to the **ceiling of 3.50m**, allowing for the installation of racks with capacity of **up to 52U**.

#### **Power**

- Two EDF dedicated 20 KV **12MW** cables.
- Generator sets with N+1 redundancy, providing 48 hours **operating time** at full load on the site.
- Power density: up to **1,5kw/m<sup>2</sup>** (standard level **1 kW to 8 kW**) per rack.
- Two independent AC power sources per rack.
- **20 min UPS battery life** at full load.
- Up to **8MW** total IT power available.

### Environment and cooling

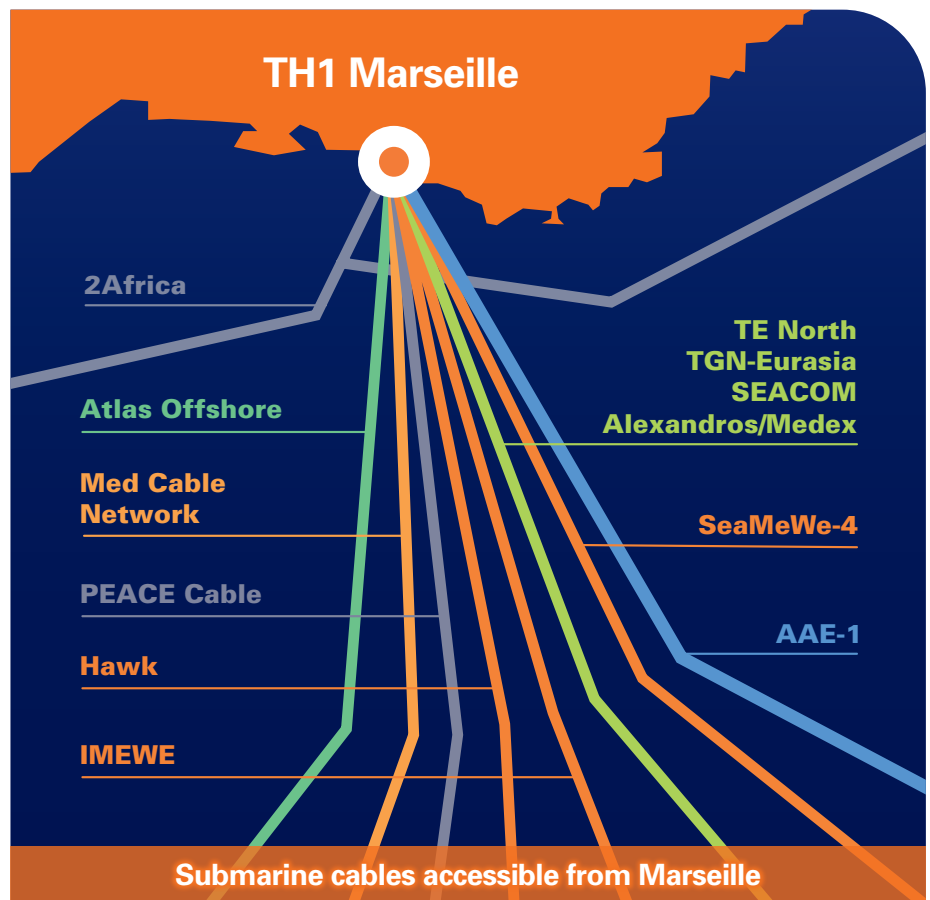

- 2 x cooling units with “freecooling” for N+1 redundancy
- 2 independent iced water supplies to provide N+N chilled water distribution
- Cooling pumps and cabinets in client halls (CRAH) connected to **2 separate power supplies**
- Continuous temperature control in client halls in accordance with Ashrae recommendations

### Connectivity

- Carrier-neutral data center to give our clients freedom to choose carriers or connection points
- Direct access to **multiple** connectivity providers through an **MMR service**
- Access to submarine cables supplying the city of Marseille
- 2 fiber entry points over the building

### Fire detection and suppression

- Very early smoke detection alarms (Vesda) installed throughout the facility
- **Inert gas** extinguisher system compliant with APSAD certification

### Security systems

- Single point of entry system, with RFID cards linked to a biometric identification system.
- Surveillance cameras monitoring the site perimeter, loading bay, reception area and all shared areas.
- Strict security procedures are in force to ensure goods inward and outward facilities are secure.
- A trained security team, operating 24/7, controls site access with verification of access rights and visitor identity.
